# Request Mapping

Spring MVC View Resolver:

- Configures paths to locate JSP files using spring.mvc.view.prefix and spring.mvc.view.suffix in application.properties.

Tomcat Jasper Dependency: Enables JSP support in Spring Boot.

1. If you want to map (use annotation called @RequestMapping("/"))

```java
@Controller
public class HomeController{
   @RequestMapping("/")
   public String home(){
     return "index.jsp";
   }
}
```

2. Run

⇨ You get something to download.

3. Why isn't it working?
   ⇨ By default, Spring Boot does not support JSP.
   ⇨ Need dependency [MVN Repository](#)

1. **Tomcat Jasper**
org.apache.tomcat » tomcat-jasper

Tomcats JSP Parser

Last Release on Dec 12, 2023

As per the Tomcat version, use the Tomcat Jasper version.

4. Run again.

Hello World!!!!
